# Overview

Take control of your global trade operations in a compliant, risk-free manner from anywhere, and at any time – with **ONESOURCE™ Global Trade**

ONESOURCE Global Trade is a trade automation solution providing a single global interface that simplifies your global trade compliance, while also providing senior management with a global view of your trade compliance operations.

This comprehensive global trade management solution is designed to help multinational corporations increase efficiency, reduce costs, manage risk, and seamlessly meet compliance regulations.

# Global Trade Content

Ensuring compliance even in one country is a complex task. Imagine doing the same for multiple countries across the globe where you are doing business.

Thomson Reuters ONESOURCE Global Trade Content provides a centralized repository that contains the most current regulatory trade data available from over 210 countries and territories. You can reference a wide range of global trade content – including tariff schedules, trade agreement rules of origin, import and export controls (OGA/PGA), and more.

# Denied Party Screening

Manually identifying denied parties and sanctions, or even using outdated search engine technology is not only cumbersome but can be risky for your business.

Thomson Reuters ONESOURCE Denied Party Screening software integrates with your company's existing ERP, CRM, and SRM systems, so you can seamlessly and automatically screen your customers and suppliers against 350+ global lists for restricted persons, embargoed countries, and companies that are owned by these denied entities.

# Global Classification

Multiple processes used for classification by your teams across the globe may lead to discrepancies and non-compliance.

With our team of over 200 researchers covering 240 countries and providing regulatory updates to our global product classification software — Thomson Reuters ONESOURCE Global Classification — you'll spend fewer hours determining and maintaining product classification.

# Trade Analysis

Managing multiple trade lanes across various countries without having real-time visibility into the risks becomes costly for a trade department.

ONESOURCE Trade Analysis provides insight into not only the organization's current state of trade compliance costs and risks, but also the potential opportunities that could be realized through implementing changes to sourcing, sales, and/or distribution strategies.

# Supply Chain Compliance

You need the ability to efficiently communicate, manage, and track all business partners within the global supply chain to identify and reduce risks while increasing compliance.

With the ONESOURCE Supply Chain Compliance solution, you can increase visibility, manage compliance, and mitigate risks across the supply chain. It enables users to electronically route assessments, requests, and reminders across companies, departments, and individuals – reducing the cost and burden of managing a paper trail.

# Global Duty Optimization

Complying with duty savings opportunities such as FTAs and regional customs regimes can be administratively burdensome due to time, information availability, and labour constraints.

With ONESOURCE Global Duty Optimization, you can leverage a network of duty suspension programs to achieve cost savings and generate ROI. Our software supports various savings opportunities worldwide – including free trade agreements, US drawback, US foreign-trade zones, IMMEX/maquiladoras, EU customs regimes, China processing trade regimes, Thailand Board of Investment, and Thailand free zones.

# Free Trade Agreement

With 300+ preferential trade agreements now in place, leveraging FTAs across the globe is an even more complex and daunting task when done manually.

ONESOURCE Free Trade Agreement (FTA) Management, to help you take advantage of FTAs by identifying opportunities to qualify goods under FTA-specific rules of origin. Streamline logistical processes and cut down manual work, so you can comply with FTA guidelines and reduce or eliminate duties. Our FTA software's unique architecture can accommodate any existing, changing, or future free trade agreements, including NAFTA, CFTA, SFTA, AFTA, ILFTA, JFTA, UKFTA, CAFTA, and TAFTA.

# Global Trade Visibility

For most companies, there is limited visibility to trade data that resides in disparate internal systems, with various government agencies, and across multiple customs brokers and freight forwarders.

With ONESOURCE Global Trade Visibility, you can create a harmonized, unified view of trade activity across all trade lanes. Your trade data is continually updated, allowing you to make more informed decisions, measure and manage key performance indicators, identify savings opportunities, and lower the risk of noncompliance with customs regulations.

# Export Management

Exporting is a gradual and complex task since you need to ensure the entire process is error-free, transparent, and compliant with a myriad of government regulations.

Thomson Reuters ONESOURCE Import Management is an importing software solution that keeps your process running smoothly — which means a lower risk of noncompliance or overpaying duties. Our world-class import management software gives you control over documents at every stage and keeps information consistent, secure, and linked in a centralized database. Plus, it automatically calculates costs and expenses, so you can better plan and identify savings opportunities.

# Business Benefits: Be Compliant, Minimize Risk

- ✓ Avoid supply chain delays and overpayment of duties
- ✓ Access the most up-to-date regulatory information available for 210+ countries and territories
- ✓ Decrease the likelihood of penalties and customs audits with correct, automated product classification
- ✓ Protect your company reputation and avoid export sanction violations, penalties, and loss of export privileges through automated screening of customers and suppliers
- ✓ Take advantage of duty savings opportunities such as free trade agreements and foreign-trade zones
- ✓ Use advanced analytics to gain visibility into your trade compliance operations, identify potential risk factors, and evaluate strategic savings opportunities
- ✓ Minimize the impact on your IT infrastructure with a cloud-based solution and easy integration with leading ERPs
- ✓ Directly file with government agencies around the world to improve the quality and speed of customs communication
